

THE SHAME OF ROMANIA

A mother dog is lying in a pool of blood while the puppies keep drinking milk from her dead body. This happened during the Ukrainian massacre of the stray dogs. This horror in Romania is taking place now while the international Media and Europe remain silent.

I understand that we are facing the daily horror of the Syrian civil war but even what is happening in Europe to other living beings is no less horrific.

Children are taking part in animal massacres. Children whose behaviour reminds us of William Golding's "Lord of the flies" are actively participating in these barbaric killings. Dog are being burned alive and decapitated. All these atrocities are happening now-as we speak. The Government of the Rumanian President Basescu is responsible for the massacre of thousands of stray dogs by legalizing mass killings through atrocious methods. Basescu has ignored the Rumanian law of animal protection by not observing treaties and international conventions. Despite the appeals of Italian members of European Parliament (Muscardini (ECR), Zanoni (ALDE), Amati, and Cirinnà Granaiola (PD), De Petris (SEL)) the slaughter continues. Romania is funded by EU with millions of euro to solve the problem of stray dogs but the money is directed in other directions by corrupt politicians. The Basescu Government does not accept the rules of democracy defined by Europe.

The media gives us trivial information about dancing dogs and elephants playing with dogs but says nothing about the horrors in Romania. In Italy, on the 3rd of October the Animalist European Party is preparing a demonstration outside the Rumanian Embassy. A petition is circulating for the expulsion of Romania from Europe.

PLEASE HELP US TO INFORM THE WORLD AND STOP THE SLAUGHTER!

Paolo Ricci
